REMARKS

Jim,

I met today with D/OC, DD/OC, D/OOP + DD/OOP and asked that they knock off the bickering + square away the turf problems. Will see what happens.

MEMORANDUM FOR: Deputy Director for Administration
                                                                    STAT
FROM:

                 Director of Data Processing

SUBJECT:         Office of Communications and Office of Data
                 Processing Regulations

    1.  With the introduction of the Information Systems
Board, there is a great deal of ferment in the whole area of
information handling which could impact the interrelationship
between the Office of Communications and the Office of Data
Processing.  Clearly, the two offices are becoming more closely
interwoven.  For example,              relied on information          STAT
from IBM and from DEC to present a briefing to the ISB on a
local area network (LAN) designed for data transmission within
the new building.  The LAN, almost by definition, belongs to
both offices.

    2.  ODP has been requested to comment on a proposed
revision of          which describes the mission and functions     STAT
of the Office of Communications.  The proposed revision makes
it unclear whether OC is in the telecommunications business or
is instead in the information handling business.  Moreover, it
is unclear from the language of the revised regulation whether
or not ODP will continue to have a role in the design of the
network architecture for information handling systems.  ODP
cannot concur with the proposed revision of                        STAT

    3.  OC will shortly be asked to comment on          which      STAT
describes the mission and functions of the Office of Data
Processing.  OC may well find the ODP charter as troublesome as
ODP finds the OC charter.

    4.  Rather than engage the two offices in protracted
public debate on the assignment of responsibilities for
information handling systems support, I suggest that further
action on the proposed revisions to the regulations be set
aside until senior Agency management has had a chance to more
fully explore information systems.
                                                                    STAT
